

## 35W Eurocassette

AC-HVDC  
power supplies 

The HCE35 series power supplies are highly stable switch-mode power supplies with low ripple.

Due to the high switching frequency a low residual ripple is achieved in the generated output voltage, with high stability, good regulation dynamics, and at the same time only a low amount of stored energy.

The compact light weight eurocassette design provides ease of integrating via a 3U subrack (19" mounting).
